

Committee Attachment "A"

Observations about the 2005 Symposium

- Time frame between sessions was too long.
- One speaker for the day may be a better approach.
- May need a smaller space make the room seem fuller.
- Audience counts were 59 and fewer through the session.
- Wade liked the idea of a philosophical and a practical delivery at the next session.
- People working on the student skit would have been better heard with lapel microphones.
