

## **Textbooks**

Many of the textbooks that will be required throughout the Program are published by Elsevier/Mosby Publishing Company. The Elsevier textbooks will arrive in the CUMC Bookstore bundled together. Included in the bundle is an added feature called EVOLVE. This feature will be reviewed in orientation. It will allow students to be able to search on-line for a term and receive back page numbers from each required textbook where the term is found. It is also possible to take notes or highlight on the on-line version. You will receive both an on-line version and a hard copy of these textbooks. Required textbooks from other publishers can be purchased used if any are available. Textbooks are not typically available in the bookstore until the week preceding classes.
